

The Sagem MO200 GPRS module used in the newly released Maestro Micro RTU

SSE Holdings Pty Ltd, a major player in Telemetry Systems in South Africa, has recently introduced into their Maestro micro RTU range of Telemetry products. The Sagem MO200 GPRS module will be used in the micro RTU.

The new Maestro micro RTU with GPRS, is will be deployed in Electrical, Water and Sewage monitoring systems where reliable real time data is required at low costs to the client.

The Micro RTU can communicate via the Picasso OPC to SCADA and other dedicated Master Station Software Applications

The Micro RTU compliments the existing range of Maestro RTU that have become an industry standard in the South African Market.
